ATLANTIC SHALLOW WATER DIFFUSER

Innovative shallow water diffuser that maximize circulation and oxygen transfer by moving more water with less energy. The secret is in the innovative diffuser tubing, an extruded EPDM compound that offers tremendous longevity and resistance to fouling. Bubble sizes that decrease as pressure rises maximize surface area for extremely efficient gas diffusion. Easy to fill with any onsite sand or gravel, diffusers ship empty to save weight on freight.

SKU 16237

Brand ATLANTIC

Application/Use Aeration

Size

Dimension 13.5"W X 12"D X 8.5"H

Characteristics

Color

Data

Flow Rate 15-75 LPM
