

REPLACEMENT BULB PAR36 50WFL/HX

PAR36 LED bulbs provide flood lighting that is perfect for RV and boat applications such as recessed ceiling lights and cabin lights that accept PAR36 bulbs with G53 screw-pin bases. This sealed-beam LED flood light bulb emits up to 730 lumens of natural white, warm white, cool white, amber, or green illumination in a wide 160° beam pattern. A parabolic dome lens with diffusing optics reduces glare and eliminates the appearance of a sharp contrast between illuminated and non-illuminated areas. This energy-efficient LED bulb is capable of being driven at 9 watts but typically consumes no more than 7.3 watts of power; a halogen bulb with comparable light output would consume 50 watts. The weatherproof LED flood light bulb has 12V AC/DC operation and is designed to last 42 times longer on your motorhome or boat than halogen bulbs.
